Full Face Rejuvenation

A full-face rejuvenation is tailored to each client to achieve a natural, refreshed look. This client received midface and lip filler to add back structure to areas of loss related to the aging process. She not only looks years younger, but also feels more confident. Individualized treatment plans are customized to focus on multiple areas of the face. Over time, we combat loss of volume and elasticity. While our goal is turn back time, it's important to maintain a healthy, enhanced version of you. Meredith achieved this by using Juvederm Voluma in the midface and Juvederm Ultra in the lips. This client also maintains Botox every three months to minimize the impact of muscle strain on the skin . Call us today for your customized full-face rejuvenation! 919-521-8282.

Dermal Filler

Bundle and Save!

Our three hottest products are on sale this month when you bundle! You'll save 20% when you purchase Anti-Ox CE Fe, Ageless Biopeptide Growth Factor Serum, and Needle Free Serum. Our medical grade skincare works to unpeel the overall appearance of the skin's complexion and firmness. These products have powerful antioxidants to protect skin, boost the power of SPF, lighten pigmentation and smooth the appearance of fine lines. Niacinamide, growth factors, hyaluronic acid and many other potent ingredients work to boost collagen production and help fight against free radicals. Take advantage of this great sale price! Originally these products are $337, but when purchased on sale they are only $269.60. You must purchase all three to receive the sale price. We offer curbside pickup on all New Life Aesthetics products.

Skincare

Temple Restoration

Before After

It's no secret our temples lose volume in the natural aging process. But did you know we can restore that loss with filler between the hairline and the eyebrows? Meredith treated this client with Juvederm Volluce dermal filler to replenish lost volume and support the eyebrows. This created a more youthful appearance. Temple filler can improve the overall balance of the shape of your face, changing the concavity of the temple hollows, to a convexity that is harmonious with the cheekbones. Book your temple filler today with Heather or Meredith.

Before After

"Brotox"

The number of men getting Botox over the past decade has skyrocketed. Men are finding that this simple procedure can help them look and feel their best. "Brotox" helped this patient gain confidence and lose fine lines and wrinkles. It makes deep furrows look less pronounced and can help prevent the formation of new wrinkles. You can see the transformation in this photo from our Visia Skin Analysis System. Visia measures the depth and number of wrinkles. The dark green lines show the deep creases and the light green lines represent finer wrinkles. An analysis is done on every client here at New Life Aesthetics. Men may need more units of Botox than women simply because their muscle tissue is thicker and more robust. Botox can be done on your lunchbreak and there's no downtime. Call today to book your Botox consultation with Heather or Meredith. 919-521-8282.

Welcome Natalie!

Please help us welcome our newest team member Natalie Walcott! We are so excited to have Natalie join us here at New Life Aesthetics as a Clinical Aesthetic Assistant. She is a licensed esthetician with a passion for the aesthetic industry. Natalie is from the Raleigh area and has a background in professional make-up. She spent 6 years in New York and Raleigh doing theater, print and cinema make-up artistry. Natalie's favorite aesthetic treatment is microneeding and she enjoys educating clients on how to maintain skin care at home. We are thrilled to have her on our team! Welcome Natalie!

Pink Ribbon Classic

October is Breast Cancer Awareness month and New Life Aesthetics stands behind important causes to help find a cure. This month we hope you'll join us in supporting the 6th Annual Pink Ribbon Classic. It's a golf, tennis and pickleball tournament to raise money for the local Susan G. Komen Metastatic Breast Cancer Collaborative Research Initiative. This is a new, first-of-its-kind, collaborative effort in partnership with Duke Cancer Institute and UNC Lineberger Comprehensive Cancer Center. It's established to "ignite collaboration and fast track research for patients living with metastatic breast cancer. This is breast cancer that kills." The tournament takes place at the North Ridge Country Club October 6th and 7th. New Life Aesthetics is a proud sponsor. We encourage you to contribute time, talent or financial assistance to this special cause. Just click the link below to see how you can make a difference!
