

Clinical Repair

Eye Complex

DESCRIPTION

This next-generation eye treatment targets multiple signs of aging with a clinically advanced blend of peptides, antioxidants, and botanical actives to visibly smooth, firm, and brighten the delicate eye area. At the heart of the formula is a bioengineered, plant-derived growth factor that mimics the activity of IGF-1, helping to stimulate skin regeneration, support cellular renewal, and visibly reduce fine lines and dark circles. Wrinkle-relaxing peptides, a stabilized form of vitamin C, and circulation-enhancing botanicals work synergistically to depuff, tone, and energize fatigued eyes. Lightweight and fast-absorbing, this formula hydrates and revitalizes without irritation—leaving the eye area refreshed, luminous, and visibly renewed.
