That Halo Glow!

Laser season is in full swing and the results are incredible. Sun damage and dark spots on this client have diminished after just one Halo treatment. She added BBL for an extra boost of radiance. Halo is a hybrid laser that works to increase collagen production and even out skin tone and texture. It improves fine lines and wrinkles and helps with acne scars and large pores. This minimally invasive technology applies two different laser wavelengths to maximize the effectiveness. Halo improves visible signs of aging for healthy, natural-looking, beautiful skin.
