Spice up your love life with diVa and O-shot! This increases collagen production and blood flow. It improves sensation, tissue tightening, lubrication and incontinence. O-shot utilizes regenerative medicine, placing Platelet Derived Growth Factors in the female tissue for the recovery of sexual function. It stimulates stem cells, fibroblasts, and collagen to help increase blood flow. diVa and O-shot can be combined or stand-alone treatments. Call us today for an appointment 919-521-8282.

## Healing Power

Join us in supporting children in the triangle with our featured non-profit, Hope Reins. This wonderful non-profit organization pairs kids in crisis with rescued horses and mentors to find hope and healing. This month we encourage you to lend support to Hope Reins. The organization helps children and teens who struggle with severe trauma and physical, emotional or sexual abuse, cancer, suicide, debilitating anxiety, or living in homelessness, poverty, group homes or foster care.
