

Retinol Eye Cream

DESCRIPTION

A rich and restorative, all-in-one, anti-aging eye cream contains peptide complexes, a breakthrough Retinoid, and a form of Vitamin K, to reduce dark circles, promote collagen production to improve fine lines and wrinkles, and increase cellular turnover resulting in healthy, younger-looking skin in this delicate area.

BENEFITS

- ✓ Contains a breakthrough Retinoid to increase cellular turnover
- ✓ Contains multiple peptide complexes to aid in the production of collagen resulting in more youthful skin
- ✓ Firms, tightens and brightens aging skin
- ✓ All-in-one eye cream that effectively combats signs of aging

DIRECTIONS FOR USE

- Apply to clean skin in the eye area in the evening only. Apply two to three times per week. Increase usage as tolerated. Broad-spectrum sunscreen is recommended daily while using this product. For topical use only.
