

NEW LIFE AESTHETICS

August 2021 Newsletter

COMING SOON!

SkinPen[®]
by Bellus Medical

The gold standard is in this little blue pen. We are excited to announce Skin Pen Microneedling will be our newest treatment at New Life Aesthetics. Skin Pen Microneedling is a skin rejuvenation procedure that helps improve the skin's appearance by stimulating it's natural ability to produce collagen and repair itself. It targets wrinkles, fine lines, acne scars and age spots. The skin pen device quickly and repetitively induces microscopic holes into the skin surface. This procedure stimulates a healing response in the body at the treated site. There is little to no downtime. Restore your youthful glowing skin with Skin Pen!

CLEANSE WITH
CONFIDENCE

The Beta Enzyme Cleanser is 20% off this month! It is gentle enough to use everyday and delivers a brighter, clearer complexion. This cleanser's natural papaya enzymes and Salicylic Acid exfoliate your skin to encourage the healthy production of new cells. It's ideal for most skin types including acne prone and aging skin. We offer curbside pickup for all New Life Aesthetics products.

OUR TEAM IS GROWING!

Heather Shelton, BSN, RN

It is with great pride we announce the newest member of our New Life Aesthetics Team. Please help us welcome Heather Shelton to our practice. Heather is a Raleigh native and attended UNC-Chapel Hill where she was a member of Sigma Theta Tau International Honor Society and received her BS in Nursing. After practicing nursing in endoscopy and home health, Heather found her home in aesthetic nursing. For the past five years, Heather has honed her craft with the art of injectable therapies, various laser modalities and CoolSculpting. When she is away from work she fills her days with her precious family and friends.

ERASE SAGGING SKIN

The results tell the story. The Subnovii Plasma Pen diminished the crepey skin on this client's neck and lower face. It's the most sophisticated Plasma technology available. The Subnovii Plasma Pen spot treats wrinkles, tightens skin and corrects brown spots. The most common areas include non-surgical brow lift, lid reduction, lipstick lines, neck bands, cleavage lines and tops of knees. Make your appointment today!

SCULPT OUT UNWANTED FAT

We are now taking appointments for Coolsculpting Elite! Sculpt your body without surgery or downtime by freezing twice the stubborn fat with dual applicators. It's the only nonsurgical way to eliminate unwanted fat cells using cold technology. Coolsculpting Elite works in 9 different areas in men and women. It gets rid of up to 25% of the stubborn fat cells and results appear in 1 to 3 months. Call today to schedule your appointment.

BETTER TOGETHER

Add SkinTyte to your Coolsculpting Elite experience and see how they work better together. SkinTyte is infrared heat in-motion which can be customizable for any skin type. It can be done year-round. Four to six treatments are recommended for best results. Combine Skintyte with Coolsculpting Elite to see tighter, smoother, younger looking skin. The combination can be done in multiple areas including the neck, arms and abdomen.
