New Life Aesthetics

Valentine's day is the perfect time to get in touch with your feminine side and we're here to make it easy. New Life Aesthetics offers DiVa feminine rejuvenation and O-shot to make you feel young again. Diva laser vaginal therapy uses fractional hybrid laser technology to resurface the vaginal canal. This stimulates deeper tissue to increase collagen production and blood flow. Diva improves vaginal texture, tone, sensation and lubrication. O-shot takes a regenerative approach that helps to recover sexual function. O-shot also stimulates blood flow, sensitivity and sexual arousal. Both treatments help to improve incontinence. Combine the two together for an extra boost of confidence.

Lower Face Restoration

Love your look from every angle! Symmetry and balance are the key components to creating a beautiful profile. Meredith used Juvederm Volux and Juvederm Voluma to correct this client's recessed chin. She added length to the chin for better projection and shaping. This compliments and balances her naturally full lips. Volux was used to mimic the projection of the bone and Voluma was used to soften the appearance of the shadows on the chin. The results are a natural, beautiful, lower face restoration. Call us today for your appointment.
