

Dermal Renewal

RECOMMENDED SKIN TYPES

INGREDIENT HIGHLIGHTS

Centella Asiatica Leaf Extract (Exosomes), Arnica Flower Extract, Swertia Chirata Leaf Extract, Mushroom Extract, Prickly Pear Stem Extract

DESCRIPTION

A comprehensive and advanced treatment product designed to support the skin immediately after procedures and long after treatment results. Powered by billions of plant-derived exosomes, rejuvenating peptide fractions, and soothing post-procedure actives, it helps calm irritation, reinforces a healthy barrier, visibly reduces redness, and supports the skin's natural recovery process while enhancing patient comfort. With continued daily use, it enhances the appearance of firmness, smoothness, and radiance, helping maintain and extend the results of professional treatments.

BENEFITS

- ✔ Soothes and calms visible redness, puffiness, and irritation for a refreshed post-procedure look.
- ✔ Accelerates visible recovery to help skin return to comfort and normal routines faster.
- ✔ Hydrates deeply while reinforcing the barrier to reduce dryness and tightness.
- ✔ Enhances firmness and elasticity while visibly reducing wrinkles
- ✔ Boosts radiance and evenness, supporting brighter, healthier-looking skin as it recovers.
- ✔ Optimizes procedure outcomes by enhancing results and extending their longevity.

DIRECTIONS FOR USE

- Apply a thin, even layer to clean, dry skin immediately post-procedure or as directed by your provider. Continue using twice daily to support recovery and enhance results long-term. Follow with sunscreen during the day.
