Reduces fine lines and wrinkles

Improves skin's barrier function

Soothes and calms skin

Hydrabalance

Through 7/26

When summer dries out your skin, Hydrabalance helps bring it back into balance. We're excited to spotlight Hydrabalance this month to support a healthy, radiant skin barrier. It's 20% off all month long! July 8th is National Love Your Skin Day and we are celebrating! Hydrabalance is designed to replenish moisture where your skin needs it most. It helps to improve dryness, texture, and overall skin balance. With consistent use, it leaves skin looking smoother, plumper, and more refreshed. Hydrabalance is a perfect addition to

any skincare routine, especially during the warmer summer months when skin can become dehydrated. We offer complimentary skincare consultations for all existing clients. Plus, we are happy to ship all of our products. Call us today at 919-521-8282.

Hydrabalance

PDGF Hair Restoration

When hair starts to thin, the right treatment can change everything. PDGF Hair Restoration helps support natural hair regrowth by using growth factors to awaken dormant hair follicles. By stimulating the scalp at a cellular level, PDGF helps improve hair density, thickness, and overall scalp health. It's the perfect option for both men and women experiencing early hair thinning or shedding. This client is thrilled after his customized treatment plan. He now has fuller, healthier-looking coverage in the treated area. If you're noticing thinning hair or want to take a proactive approach to hair health, book your appointment today. Call us at 919-521-8282 or book online at newlifeaesthetics.com.

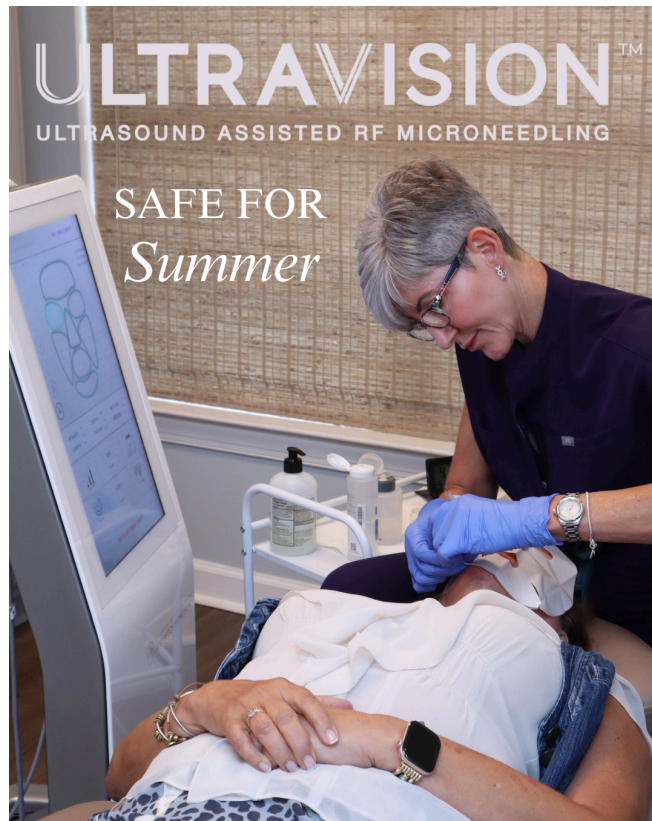

Hair Restoration

The Beauty of Botox

What if looking more refreshed could be as simple as a few tiny injections? Botox remains one of the most effective and popular treatments for reducing the appearance of fine lines and wrinkles while maintaining a natural, refreshed look. By relaxing the muscles that cause expression lines, Botox smooths crow's feet, forehead lines, and frown lines, helping you look more rested and youthful without surgery or downtime. The best part? Results are subtle, natural-looking, and can help prevent deeper wrinkles from forming over time. We offer a Botox Membership program that will help you save money with each treatment. Call today for your appointment at 919-521-8282 or book online at newlifeaesthetics.com.

Botox

Safe for summer and powerful enough to transform your skin! One of our favorite warm-weather treatments is UltraVision RF Microneedling. It works to tighten skin, improve texture, minimize pores, soften acne scars, and reduce fine lines and wrinkles. Ultravision combines tiny, precision-controlled needles with radiofrequency energy to create micro-injuries while delivering heat deep into the skin. This process stimulates your body's natural collagen production. Unlike traditional RF microneedling, UltraVision uses real-time ultrasound guidance to precisely deliver radiofrequency energy to the intended treatment depth, enhancing safety, accuracy, and results. There's minimal downtime, with just typically one to two days of redness. With proper sun protection, it's a safe and effective summer treatment. You'll see healthier, firmer, and more radiant skin. Results continue to improve for months as new collagen develops. Call today for your appointment at 919-521-8282 or book online at newlifeaesthetics.com.

More Than A Meal!

Kindness is always on the menu at A Place at the Table! This month we're proud to support this wonderful non-profit restaurant. A Place at the Table is Raleigh's first pay-what-you-can restaurant, ensuring that everyone has access to a healthy, delicious meal regardless of their financial situation. Guests can pay what they can, volunteer their time, or pay it forward to help others. Your support of New Life Aesthetics allows us to donate to organizations like this that are creating positive change in our community. We invite you to click the link below and join us in supporting A Place at the Table and helping make sure everyone has a seat at the table.
